SSH2N-S

STANDARD FEATURES

- Stainless steel interior and exterior (SS)
- Stainless steel exterior, aluminum interior (SA)
- Built in door locks with heavy duty strikes
- Recessed metal door handle
- Exterior digital thermometer
- Easy to use electronic control
- Easy access "flip up" shroud
- Three chrome plated wire shelves per section
- 6" adjustable stainless steel legs
- Stainless steel breaker strips
- Stainless steel interior door liner
- Two year parts & labor warranty

OPTIONS AND ACCESSORIES

- ☐ Security package
- ☐ 6" polyurethane casters
- ☐ Door field rehingability
- ☐ Additional shelves
- ☐ Tray slides
- ☐ Stainless steel back
- ☐ Laminate on front, sides and back
- ☐ Bottom mount electrical
- ☐ Stainless steel banking strip
- ☐ Heat shield end
- ☐ Stainless steel kick plate
- ☐ Laminate kick plate
- ☐ 4" stainless steel utility base
- ☐ 220-50-1 electrical
- ☐ 220-60-1 electrical

SPECIFICATIONS

Exterior: Cabinet exterior sides, front and shroud shall be 22-gauge, corrosion resistant stainless steel. Upper shroud shall be hinged, with stay-open feature to provide easy access to refrigeration system.

Interior: Cabinet interior shall be 22-gauge, corrosion resistant stainless steel (SS models) or heavy gauge aluminum (SA models). Bottom and top surfaces are die stamped to provide radius corners and recessed floor. Three chrome plated wire shelves are provided per section. Shelves rest on clips which are adjustable in 1" increments on stainless steel pilasters affixed to the cabinet interior. Pilasters are removable without tools for cleaning. Interior light mounted to the interior ceiling is controlled automatically through a switch mounted in the hinge assembly to protect against breakage. Door openings are protected with heavy gauge stainless steel breaker strips. An air

duct is mounted to the sides assuring low velocity, even air movement throughout the cabinet interior.

Doors: Exterior shall be 22-gauge, corrosion resistant stainless steel. Interior liner shall be stainless steel. Each door has two edge mount, self closing, cam lift style hinges. Doors can be removed from cabinet without the use of tools. Metal door handle is recessed into the door for easy grip without impacting aisle space. Keyed door lock is mounted in the door next to the handle. Lock engages into a heavy duty strike mounted to the cabinet face. Door gaskets are magnetic and mount to the door snapping in place and are removable without tools.

Heating System: Cabinets are designed to maintain temperatures between 120°F and 200°F. Heating elements are helical shaped, with tubular fins. High speed blower provides uniform airflow in the cabinet. Entire heating system is mounted to the exterior of the cabinet ceiling,

outside the food zone. It is assembled as one piece and can be removed as one piece. Temperature is controlled by an adjustable electronic thermostat. System on/off switch is located on the front exterior of the cabinet.

Electrical: Standard electrical is 120/208-240 volt, 60Hz, single phase. Connection must be hard wired to junction box on exterior top of the cabinet.
